

# reSorb

FRAMED

**ACOUSTICS**  
by design

reSorb Framed -  
created to absorb  
sound at speech  
frequencies in  
meeting rooms,  
atriums, classrooms  
and offices.

Comprising of a bespoke aluminium frame in a variety of finishes with the sound absorbing foam core from BASF, finished with an acoustically transparent fabric printed with any digital image or solid RAL colour.

Available to fix directly to a wall or as a double sided free standing screen. Not only will reSorb Frame reduce noise and reverberation in a space, it also has a great aesthetic.

# ACOUSTICS by design

The printed fabric is fitted by hand with no tools required, so changing the fabric at a later date to refresh a marketing message or with the latest imagery is simple and does not require our installation team reducing the overall cost.

Choose from a variety of standard sizes or contact us for custom sizes up to 150m<sup>2</sup>.

To create a versatile break out space in which to have non confidential meetings without disturbing colleagues the reSorb pods are ideal. Plain RAL colours or printed finish complete with sound absorbing core.
